The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 18-28 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Picon et al (Biotechnology Letters).

Picon et al teach a process for producing cheese (e.g. Manchego) comprising the addition of phospholipase C in the amounts claimed to a conventional cheese making process (see entire document, especially the abstract and the Materials and Methods). Picon et al also teach cow's milk as an option (see page 347, column 2).

The claims appear to differ as to the specific recitation of purified phospholipase and a decrease in oiling-off.

Purification of phospholipase and a decrease in oiling-off would be no more than inherent and/or obvious to that of Picon et al as the same components and process steps are used to obtain the same final product.

Claims 29-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Picon et al in view of Shipe et al (J Dairy Sci Vol 58, No. 8).

Picon et al disclose a process for producing cheese (e.g. Manchego) comprising the addition of phospholipase C in the amounts claimed to a conventional cheese making process (see entire document, especially the abstract and the Materials and Methods). Picon et al also disclose cow's milk as an option (see page 347, column 2).

The claims appear to differ as to the specific recitation of phospholipase D.

Shipe et al disclose the treatment of milk with phospholipase C and D (see entire document, especially Table 3).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made to use phospholipase D in that of Picon et al because the use of phospholipase D in the treatment of dairy products is conventional in the art.

It is further noted that Applicant neither excludes additional components of Picon et al nor provides evidence to establish unexpected results.

Applicant's arguments with respect to claims 18-41 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is (571)272-1411. The examiner can normally be reached on Tuesday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keith Hendricks can be reached on 571-272-1401. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
